PROFESSIONAL SUMMARY

AI Solutions Engineer & Automation Specialist with 8+ years of experience bridging business strategy and advanced technology implementation. Proven expertise in architecting AI workflows, automating enterprise processes, and building full-stack applications. Strong background in requirements analysis and large-scale system migrations. Currently leveraging LLMs, ComfyUI, and N8N to generate $20K+ in freelance revenue while driving operational efficiency.

PROFESSIONAL EXPERIENCE

Gen AI Engineer & Consultant — Evolve Interiors LLC, Dubai, UAE
2024 – Present

- Architected end-to-end AI workflows using ComfyUI and Stable Diffusion, reducing design iteration cycles by 40% and increasing presentation capacity by 3x
- Built 4 internal applications (OCR document processor, Leave Management System, Document Suite, Asset Pipeline Automator) using TypeScript, Supabase, and Vercel
- Designed and deployed N8N automation workflows that eliminated 15+ hours/week of manual processes
- Created custom LoRA models and prompt engineering pipelines for brand-consistent AI-generated visuals

Sr. Software Engineer / Business Analyst — Tech Mahindra, India
2022 – 2024

- Led large-scale Warehouse Management System (WMS) migrations for enterprise clients, aligning business logic with scalable cloud infrastructure
- Authored Business Requirements Documents (BRDs) and Standard Operating Procedures (SOPs) for cross-functional teams
- Bridged technical and business teams to ensure seamless system transitions with zero downtime

Consultant — Capgemini, India
2018 – 2022

- Provided functional and technical support for logistics and supply chain clients across the Manhattan WMS platform
- Troubleshot complex system issues, reducing average resolution time by 30%
- Optimized warehouse management workflows, resulting in improved operational throughput

Application Developer — BNY Mellon Technologies, India
2016 – 2018

- Built robust APIs and user interfaces for financial services applications using AngularJS and Bootstrap
- Developed reusable component libraries that accelerated frontend development across multiple teams

SKILLS

AI & Automation: LLMs (ChatGPT, Claude, Gemini), Prompt Engineering, RAG, AI Agent Design, ComfyUI, Stable Diffusion, Custom LoRA Models, N8N Workflow Automation, Claude Code, Cursor/Codex

Full-Stack Development: TypeScript, Python, SQL, Supabase, Vercel, REST APIs, Docker, Git, AWS, Software Architecture

Business & Operations: Business Analysis, Requirements Documentation, WMS/Supply Chain, Stakeholder Management, Process Optimization

Design: Figma, UI/UX Design, Design Systems

EDUCATION

Bachelor of Engineering in Computer Science — Chitkara University, India
2014

Visa Status: Employment Visa (valid till July 2026)
